EDUCATION

University of Michigan — Ann Arbor, MI
Bachelor of Science in Computer Science, Minor in User Experience Design — *May 2025*

- GPA: 3.34/4.00
- Coursework: Introduction to Computer Organization (EECS 370) · Data Structures and Algorithms (EECS 281) · Web Design, Development, and Accessibility (SI 339) · Web Systems (EECS 485)

Yonsei University — Seoul, Korea
Study Abroad — *June 2022 – Aug. 2022*

WORK EXPERIENCE

Software Engineer Intern — June 2022 – August 2022
DOGU CO., LTD — *Seoul, Korea*

- Conducted comprehensive market analysis to identify current trends, challenges, and opportunities for indoor robotics in hospital environment
- Developed strategies to enhance indoor robotics technologies, emphasizing improvements in path planning, obstacle navigation, and precise location awareness
- Created Vector Maps on top of Point Cloud Data (PCD) maps using Vector Map Builder (Autoware Map Tools)
- Tested advanced sensor technology, including cameras and sensors, to detect dangers and ensure swift response

Community Center Assistant (CCA) — August 2021 – Present
West Quad Community Center — *Ann Arbor, MI*

- Develop initiatives, such as game nights and cultural potlucks, to enhance inclusivity and community engagement
- Manage mail and packages securely and handle resident lockouts and lost keys, ensuring resident safety
- Provide timely and knowledgeable responses to inquiries from residents and visitors to create a welcoming environment

PROJECT EXPERIENCE

Client/Server Side Dynamic Website (Instagram Clone) — December 2023 – Present

- Create dynamic photo-sharing website where users can create accounts, upload photos, post comments, like posts, and follow users
- Develop web application using React for front-end, Python/Flask for back-end, and SQL for database

E-Commerce Website — November 2023 – December 2023

- Developed e-commerce website called *Happy Holidays*, platform where users can discover and purchase unique Christmas gifts
- Created responsive design by implementing a hamburger navigation bar for mobile/tablet views and utilizing JavaScript for image gallery synchronization to ensure seamless and visually engaging experience

Stock Simulation — September 2023 – October 2023

- Developed stock market simulation program using C++, priority queues, functors/comparators, and STL
- Implemented algorithm to maximize profit for time traveler by identifying ideal stock purchase and sale times, enhancing problem-solving and object-oriented design skills

LEADERSHIP EXPERIENCE

Wolverine Support Network Leader — August 2022 – Present
Wolverine Support Network — *Ann Arbor, MI*

- Facilitate weekly peer support groups of 8-12 members to engage in open dialogue about college life, well-being, and overall struggles, ultimately improving students' mental health
- Create fundraiser event to raise funds to support continuation of WSN as a cost-free resource
- Directed and successfully marketed fundraising events such as pie fundraiser and raffle sales and raised $4000

SKILLS

Technical: C/C++, HTML, CSS, JavaScript, Python, SQL, Flask, React, AWS
Languages: Proficient in English and Korean
